Lab Assignment Using Function

a. WAP using a function to print the first 10 natural numbers.
b. WAP using a function to print the first 10 even numbers.
c. WAP using a function to print the first 10 odd numbers.
d. WAP using a function to find the sum of the first 10 natural numbers.
e. WAP using a function to find the square of a given number.
f. WAP using a function to find the cube of a given number.
g. WAP using a function to check whether a number is even or odd.
h. WAP using a function to find the greater of two numbers.
i. WAP using a function to find the greatest of three numbers.
j. WAP using a function to check whether a number is positive, negative, or zero.
k. WAP using a function to calculate the factorial of a number.
l. WAP using a function to check whether a number is prime.
m. WAP using a function to print the multiplication table of a given number.
n. WAP using a function to find the sum of the digits of a number.
o. WAP using a function to reverse a given number.
p. WAP using a function to check whether a number is a palindrome.
q. WAP using a function to check whether a year is a leap year.
r. WAP using a function to find the GCD (HCF) of two numbers.
s. WAP using a function to find the LCM of two numbers.
t. WAP using a function to print the Fibonacci series up to n terms.
u. WAP using a function to check whether a number is an Armstrong number.
v. WAP using a function to calculate \(x^n\) without using the pow() function.
w. WAP using a function to find the sum of all elements in an array.
x. WAP using a function to find the largest element in an array.
y. WAP using a function to count the even and odd elements in an array.
